

Product Description & Technical Specifications for World Class Epoxy Primer

PRODUCT DESCRIPTION

WORLD CLASS EPOXY PRIMER is designed to be used over slick finished concrete and moisture sensitive concrete, and outdoor concrete that will be surfaced with the WORLD CLASS CUSHION SYSTEM. Depending on the porosity of the concrete, this penetrant sealer is capable of penetrating the pore structure of the concrete up to 1/8" and provide an effective subsurface barrier which inhibits moisture migration. NOTE: This product contains flammable liquids.
